**MBA/MSc Big Data &
Artificial Intelligence**

The program is designed to provide students with cutting-edge skills in data analysis, machine learning, and artificial intelligence, while offering the flexibility of a work-study format. With a comprehensive curriculum covering big data platforms, data lakes, data science, quantum computing, and decision intelligence, the program prepares future data professionals to succeed in a global, innovation-driven environment.

Program accredited under the French RNCP number 38474
