## MBA SAP Finance & Accounting

This MBA program is designed to train future finance leaders in the use of SAP tools and methodologies, enabling them to manage and optimize financial and accounting operations in modern, data-driven organizations.

With a strong focus on SAP S/4HANA, financial reporting, controlling, compliance, and digital tools for performance management, students gain in-depth knowledge of how to align financial strategy with business goals.

The program blends financial expertise with hands-on SAP experience and business intelligence, preparing graduates to lead digital finance transformation in international environments.

Delivered in a work-study format, this MBA allows students to alternate between academic learning and real-world application in companies using SAP technologies.

Objective: to develop finance professionals capable of leveraging SAP to drive efficiency, ensure compliance, and deliver strategic insights in today's digital economy.

Program accredited under the French RNCP number 38474
