

MBA in Management & Technology

The program is designed to provide working professionals with a flexible and convenient way to advance in their careers and gain the skills needed to succeed in a dynamic business environment.

With a comprehensive curriculum covering core business principles and specialized areas such as human resources management, marketing, communication, finance and leadership, as well as applied technological tools such as Data Science and Process Mining, the program aims to provide candidates with both the technical knowledge and business expertise required for success.

Program accredited under the French RNCP number 40257
